

(a) Spatial, material and identity evidence

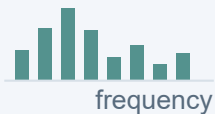

Texture and recapture

schematic

Surface, printing and display-related traces

Frequency structure

frequency

schematic

Processing and synthesis may alter spectral cues

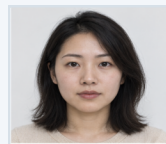

Depth and reflectance

schematic

Material response depends on the sensing setup

Identity agreement

reference

probe

Reference-to-probe relation requires trusted comparators

(b) Temporal, cross-modal and provenance evidence

Physiological rhythm

time

schematic

Temporal cues depend on capture and processing

Motion consistency

time

schematic

Track appearance across frames and challenges

Cross-modal relation

time

schematic

Test audio, visual or sensor consistency

Source and channel

schematic

Verify origin, freshness and evidence binding
